DEPARTMENT OF NUTRITION, UNCG
HUMAN NUTRITION AND DIETETICS CONCENTRATION

Freshman		**Fall**
# *3	ENG 101	College Writing I (GEC-GRD)
*3		Social and Behavioral Sciences Course (GEC-GSB)
# *4	BIO 111 & 111L	Principles of Biology I with lab (GEC-GNS)
# *3	MAT 115	College Algebra
# * 3	NTR 103	Introduction to Food Science
		Spring
# *3	STA 108	Statistics (GEC-GMT)
# * 1	NTR 282	Introduction to Dietetics (Spring only)
3		Reasoning and Discourse (GEC-GRD)
# *3	NTR 213	Introductory Nutrition
# * 1	NTR 203	Basic Quantitative Principles in Food and Nutrition
Sophomore		**Fall**
# *3	CHE 103	General Descriptive Chemistry I (GEC-GNS)
# *1	CHE 110L	General Chemistry Lab
3		Historical Perspective (GEC-GHP)
3		Elective
# *4	BIO 277 & 277L	Human Physiology with lab (or KIN 292)
		Spring
# *3	PSY 121	General Psychology (GEC-GSB)
# *3	NTR 313	Nutrition Throughout the Life Cycle (Spring, check for possible Fall availability)
# *3	CED 310	Helping Skills
# *3	CHE 104	General Descriptive Chemistry II
# *4	BIO 280 & 280L	Fundamentals of Microbiology with lab
3		Fine Arts Course (GEC-GFA)
Junior		**Fall**
# *3	CHE 205	Organic Chemistry (Fall only)
# *1	CHE 206	Organic Chemistry Lab (Fall only)
3		Literature Course (GEC-GLT)
# *4	BIO 271 & 271 L	Human Anatomy with lab (or KIN 291)
3		Humanities and Fine Arts Course (GEC)
# *3	NTR 413	Intermediate Nutrition (Fall only)
		Spring
# *4	NTR 431	Nutrition and Human Metabolism (Spring only)
# *3	NTR 309 & 309L	Quantity Food Production with lab
# *3	NTR 302	Nutrition Education and Applied Processes
# *3	NTR 421	International Nutrition and Cultural Foods (Fall and Spring)
3		Philosophical/Religious/Ethical Perspectives Course (GEC-GPR)
Senior		**Fall**
#* 4	NTR 460	Advanced Nutrition (Fall only)
2		Elective
# *4	NTR 474	Medical Nutrition Therapy 1 (Fall only)
# *3	NTR 403 & 403 L	Food Science and Technology with lab
# *1	NTR 482	Professionalism in Dietetics (Fall only)
		Spring
# *3	NTR 423	Community Nutrition (Spring only)
3		Elective
# *4	NTR 475	Medical Nutrition Therapy 2 (Spring only)
# *3	NTR 426	Management Practices for Dietetics (Spring only)

Students must complete:
1) Four Global Perspective courses, marked with GL or GN. One must be GN. These courses may also fulfill the General Education core categories.
2) Two writing intensive courses. One is NTR 302, the other may also fulfill the General Education core categories.
3) Two speaking intensive courses. One is NTR 302, and the other can be from the General Education Core Categories.
4) A minimum of 120 credits to earn a BS in Nutrition.

*Course is part of the Didactic Program in Dietetics requirement.
Must earn a grade of C or better to count toward a major. **(C- is not acceptable.)**

BECOMING A REGISTERED DIETITIAN NUTRITIONIST (R.D.N.)

Students wishing to become registered dietitians must first complete a B.S. degree which provides the knowledge requirements needed by entry-level dietitians. These requirements can be met by completing the Human Nutrition and Dietetics curriculum at The University of North Carolina at Greensboro, which is approved as a Didactic Program in Dietetics (DPD) by the Academy of Nutrition and Dietetics (AND). Following graduation, students must complete a supervised practice program. Supervised practice programs help students gain practical experience in clinical dietetics, community nutrition, and foodservice management. Finally, students must take and pass the Registration Examination for Dietitians, a national exam of the AND.

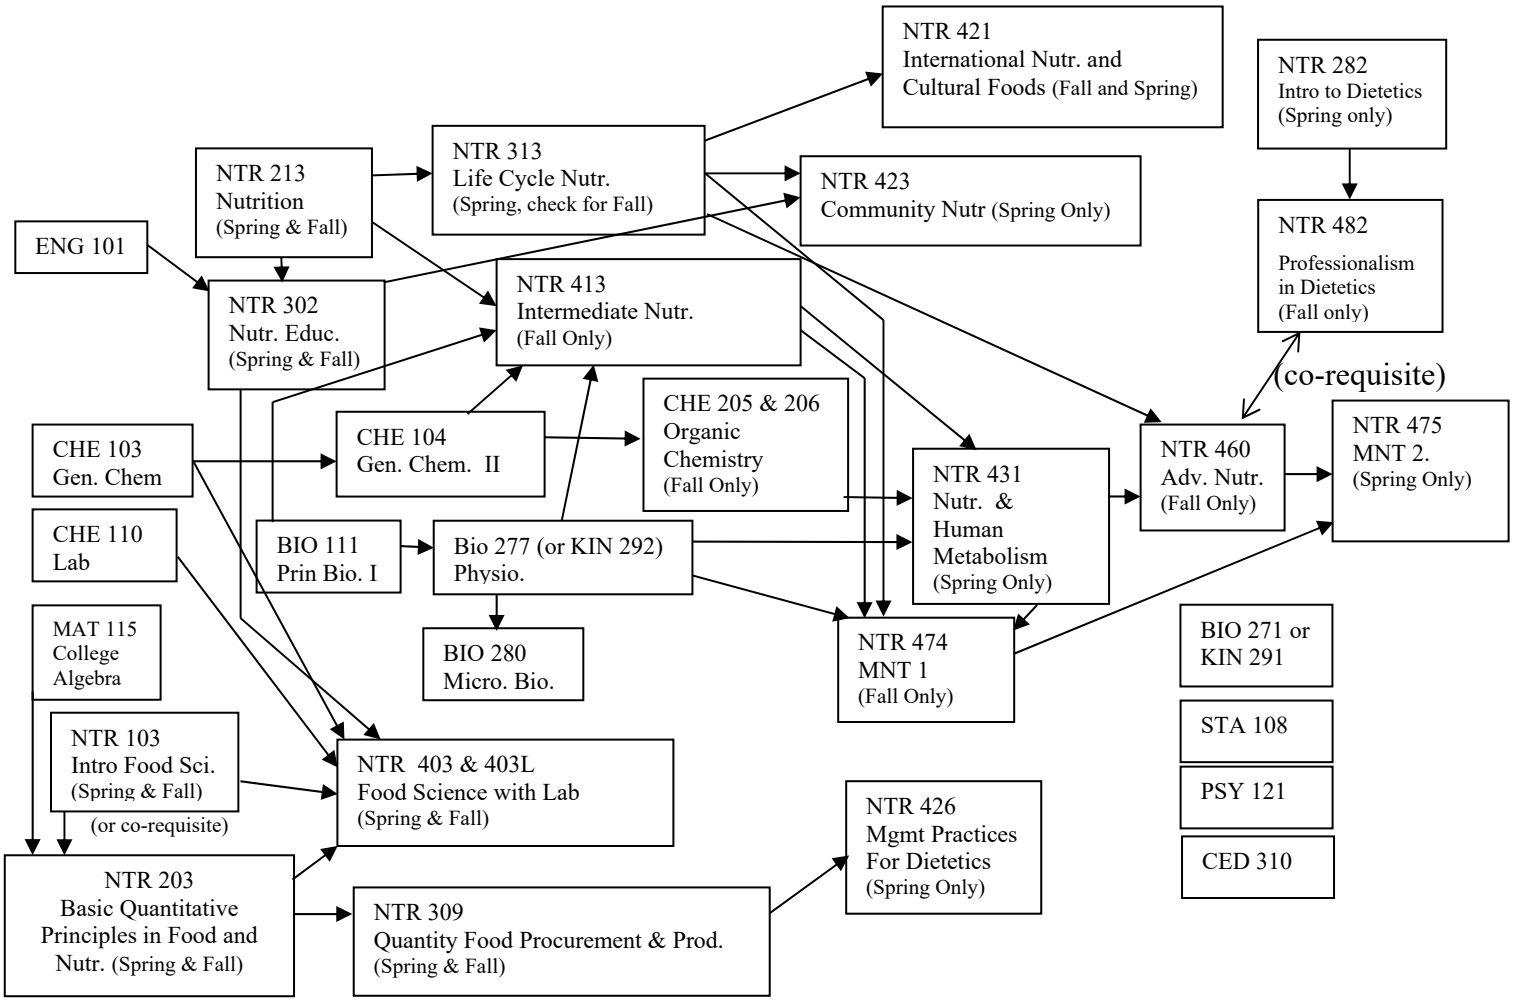
Students planning to apply for dietetic internships after graduation should discuss their plans with their advisor or the DPD director **no later** than junior year to make sure they meet all requirements and understand all that is involved in the application process.

OTHER NOTES ON THE DIETETICS PROGRAM

1. Advising is mandatory for all NTR students each semester. Students are responsible for attending the mandatory group advising day and for making certain that all requirements have been met for graduation.

2. Certain required courses are given only once a year. These should be noted as they may be prerequisites for other courses. Students have to consult with a faculty advisor each semester to receive their registration pin.

3. The following NTR and Related-Area courses are taken in sequence. Arrows indicate prerequisite courses required for progression through the major.



Please note that it takes three years to complete the sequence of chemistry, biochemistry, advanced nutrition and medical nutrition therapy (CHE 103, 104, 110L, 205, 206, NTR 431 & NTR 460, NTR 474 and 475).

Revised 3/12/2021
